Experience

- **Belvo belvo.com** Remote, Spain
Software Engineer (Mid-level, Full-time) Mar. 2025 - Present
 - Designed, developed, and maintained backend services in Python for financial, employment, and fiscal data products, taking services from initial design through production.
 - Built and operated complex data extraction pipelines and scrapers for high-difficulty sources, performing large-scale data processing and analysis to ensure accuracy, reliability, and performance.
 - Implemented and maintained cloud infrastructure using AWS and Terraform, contributing to internal libraries and delivering reliably under tight deadlines in a fast-paced startup environment.
- **Zyte www.zyte.com** Remote, Ireland
Software Engineer (Mid-level, Full-time) Jul. 2022 - Dec. 2024
 - Developed and optimized hundreds of Scrapy spiders across multiple Python projects, improving data extraction performance and reliability.
 - Led the development of new projects and executed code refactoring, enhancing scalability and reducing technical debt.
 - Collaborated with clients to deliver customized data scraping solutions, adhering to project timelines and requirements.
 - Worked in a remote, multicultural team, using Slack, Jira, and Meet to maintain seamless communication across time zones.
- **Birdie birdie.ai** Remote, Brazil
Software Engineer (Junior, Full-time) Jul. 2021 - Jul. 2022
 - Built and maintained data scraping spiders using Scrapy and Python, extracting information from diverse sources, such as e-commerce platforms and forums.
 - Implemented distributed crawling architecture, enabling the scraping of millions of pages weekly, boosting performance.
 - Created real-time dashboards for monitoring scraping activities and data pipeline efficiency.
 - Collaborated with stakeholders to define requirements and deliver data-driven solutions within tight deadlines.
- **Raccoon Marketing Digital www.monks.com** On-site, São Carlos, Brazil
Software Engineer (Internship) Apr. 2019 - Aug. 2020
 - Developed data extraction tools for APIs, databases, and web sources, supporting business intelligence and analytics pipelines.
 - Designed and automated dashboards, spreadsheets, and reports, integrating data from Google BigQuery and Google Sheets for real-time marketing insights.
 - Built data governance tools, reducing maintenance costs and improving data quality across pipelines.

Education

- **ICMC USP - University of São Paulo mba.iabigdata.icmc.usp.br** São Carlos, São Paulo, Brazil
Master in Business Administration Jul. 2024 - Oct. 2025
MBA in topics of Advanced AI and Big Data, focused on current methodologies in AI, data storage, and processing with practical implementation exercises.
- **ICMC USP - University of São Paulo www.icmc.usp.br/en** São Carlos, São Paulo, Brazil
Bachelor in Computer Science Mar. 2015 - Dec. 2021
Received a Bachelor's Degree from the Instituto de Ciências Matemáticas e de Computação, at the University of São Paulo (ICMC - USP), one of the most important Brazilian institutions in the fields of STEM.

Skills & Competencies

- **Languages:**
 - **Portuguese:** (Native)
 - **English:** (Full Professional Proficiency)
- **Skills and Tools:**
 - Python | SQL | Git | Linux | Google Cloud Platform (BigQuery, Cloud Functions, Storage, App Engine) | AWS (Firehose, Athena, S3) | Microsoft Azure (AKS, VMs, Functions) | Web scraping (Scrapy, Puppeteer, Selenium) | DevOps, Infrastructure (Docker, Kubernetes, Terraform) | CI/CD (ArgoCD, Gitlab) | Messaging and Caching (Redis) | Web Frameworks (FastAPI, Flask) | Monitoring (Grafana, InfluxDB, Loki) | Testing (Pytest, Unit Tests)
